

by getzner sylomer® ViscoSpring Platform

In the world of fitness and weightlifting, **safety and effectiveness** are fundamental elements. However, one of the most common challenges in gyms is the impact generated when **lifting weights**, which can result in **structural damage** and **discomfort** for other users.

We introduce our innovative solution: the weightlifting platform with **impact damping technology**.

ADVANTAGES

Impact damping technology:

The platform is equipped with **cushioned springs and Sylomer® Shock Absorb**, specifically designed to **absorb and dissipate the impact** generated when lifting weights.

Solution for gyms concerned about impact:

An effective and practical solution, allowing gyms to maintain a safe environment **free from complaints and structural damage**, while offering their customers a **first-class weightlifting experience**.

TECHNICAL FEATURES
