

Absorption normalized impact sound pressure level according to ASTM E1007																																																																					
Field Measurements of Impact Sound Transmission Through Floor-Ceiling Assemblies																																																																					
<i>Customer: AMC Mecanocaicho</i>																																																																					
<i>Assembly description:</i>																																																																					
Structural floor	DLT floor 151 mm (140 mm DLT +11 mm OSB)																																																																				
Interlayer	89mm Rockwool insulation + AMC25																																																																				
Topping	2 layers cement board																																																																				
Surface	NA																																																																				
Drawing or photo																																																																					
<i>Receiving room volume: 43.2 m³</i>																																																																					
<i>Sum of deficiencies: 26 dB</i>
