

<b>Absorption normalized impact sound pressure level according to ASTM E1007</b>																																																																					
<b>Field Measurements of Impact Sound Transmission Through Floor-Ceiling Assemblies</b>																																																																					
<i>Customer: AMC Mecanocaucho</i>																																																																					
<i>Assembly description:</i>																																																																					
Structural floor	DLT floor 151 mm (140 mm DLT +11 mm OSB)																																																																				
Interlayer	89mm Rockwool insulation + AMC25																																																																				
Topping	2 layers cement boards																																																																				
Surface	11mm laminated floor																																																																				
Drawing or photo																																																																					
<i>Receiving room volume: 43.2 m<sup>3</sup></i>																																																																					
<i>Sum of deficiencies: 29 dB</i>
